

In the specification:

On page 1, please insert the following heading between lines 10 and

11:

B1

Background of the Invention

On page 1, please amend the paragraph contained within lines 21-24 as

follows:

The high temperatures in the head conductors render necessary certain means of support made of special and fragile materials such as ceramic and the like, and complex insulation and coating structures.

B2

On page 2, please insert the following heading before line 1:

Summary of the Invention

On page 3, please amend the paragraph contained within lines 2-5 as follows:

The electrical contacts are connected at the two ends of the wire that forms the weft weave, to be used to convert electric current into thermal energy, creating, by suitable means, a hole in the thermo-adhesive layer that covers one face of the electrothermic sheet.

B3

On page 4, after line 27, please insert the following heading:

*BS*Brief Description of the Drawings

On page 5, after line 15, please insert the following heading:

Detailed Description of the Preferred Embodiments*BP*

On page 5, please amend the paragraph contained within line 23-26 as follows:

The heat-radiating board 30 is formed of a piece 40 of special fabric placed between two layers, 35 and and 36, of epoxicidic thermoadhesive material and is clad on the two outer faces by pieces 31 and 32 of micanite.
